DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1-75 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-75 are rejected under 35 U.S.C. 102(b) as being anticipated by Cain et al (Cain), U.S. Patent No. 6,798,761.

Regarding claims 1-75, Cain discloses a method for enhancing wireless communications, said method comprising: measuring in real-time, interference metrics associated with links between a wireless communication node and a plurality of client nodes, and scheduling, based at least in part on said interference metrics, communications between said wireless communication node and said plurality of client nodes to reduce service level variability between said plurality of client nodes (col. 4, lines 7-36, col. 5, line 50-col. 6, line 42).
